WOODBINE MUNICIPAL AIRPORT AWARDS CONTRACT FOR PREVENTIVE MAINTENANCE PROJECT

Woodbine—Mayor William Pikolycky is pleased to announce that the Woodbine Municipal Port Authority at its January 24 meeting awarded a contract to GWP Enterprises Inc., Franklinville, NJ, for Apron & Taxiway Crack repair—Phase II. The contract was for \$22,359.25

The project is for construction work to repair over 5,000 feet of cracks and remove isolated areas of pavement heaving along Taxiway A and B. Work will involve removal of the damaged pavement, clean and seal the existing cracks, apply airfield pavement markings with reflective media, as well as patching of pavement where necessary.

This project has been funded by a New Jersey Department of Transportation grant.

“We again thank NJDOT for making this funding available,” added Mayor Pikolycky. “This work will enhance the safety of our runways as we continue to position Woodbine as a destination for business enterprises.”
