WOODBINE TO RECEIVE BIDS FOR WATER TREATMENT PLANT DISINFECTION SYSTEM

Woodbine—Mayor William Pikolycky is pleased to announce that the Borough of Woodbine will open bids on January 25, 2012, for the Woodbine Municipal Utilities Authority Water Treatment Disinfection System.

Work on the Woodbine MUA Water Treatment Plant would include various state-of-the art upgrades that will improve efficiencies and help to reduce operating costs. This project also enhances operation of the newly-installed municipal well, which was itself installed with 2009 Small Cities Public Facilities funding. Funding for this project is also from a New Jersey Department of Community Affairs Small Cities Public Facilities grant.

“This enhancement of the operation of the well system will continue to assure the quality of the municipal water supply and thus the health and safety of our residents and businesses which use municipal water,” noted Mayor Pikolycky.
